

# OZONFIX®

COMPOSITION: fatty acids: oleic, linoleic, palmitic, stearic,  $\alpha$ -linoleic and oligomeric ozone oxides of these acids. Oxygen ions not less than 4,9g/l

## PROPERTIES

OZONFIX® Has very similar bio-fighting properties as pure ozone and meets the following Standard PN-EN 1040:2006 *Chemical disinfectants and antiseptics*.

The product is **sterile**.

OZONFIX® is completely

absorbed into the skin, transporting oxygen ions to the dermis.

OZONFIX® oxygenates the histamine and bilirubin, within the tissue at the application site. Active oxygen is directly involved in cellular reactions. It can be used to destroy pathogenic microorganisms: bacteria, fungi, virus inactivation.

OZONFIX® soothes irritation, protects damaged skin (mucous membrane) against bacterial and fungal complications.

Released oxygen ions stimulate the production of cytokines. It makes the epidermis more elastic.

## APPLICATION

Use only for external application on skin, nails and mucous membranes.

OZONFIX® can be used wherever there is a risk from pathogenic microorganisms such as fungi, bacteria and viruses. It is a highly oxidizing preparation.

OZONFIX®, thanks to the oil is perfectly absorbed into the dermis, helps soothe and reduce the effects of pain and itching. It aids in reducing the unpleasant effects of bites and stings, e. g. by a bee, a mosquito, flies. It operates as an anti-allergen, oxygenating tissues and helping them to heal faster.

OZONFIX® can also be used in the treatment of burns from, e.g. diapers, fire, sunburn, chemical, from the exposure to the cobalt bomb and even frostbite.

In the case of acne, OZONFIX® reduces the number of eczema's, due to the faster skin revitalization and protection of eczema's against bacterial complications (with regular application)

The oil perfectly moisturizes the skin and the oxygen ions contained within it protect the skin from the external micro-world, e. g. : atopic skin, psoriasis (supporting), eczema, diabetic foot syndrome, bedsores. For diabetic foot and bedsores use, it acts as an oxygenator and also as a prophylactic.

OZONFIX® is sterile, therefore it can be used on fresh surgical wounds (e.g. Nail disinfection following cuticle removal, post-depilation and other invasive treatments on

the body) reducing pain and inflammation and helping them to revive faster.

Immediate destruction of viruses such as herpes, reduces itching and aids faster healing of the skin. Does not allow for the formation of skin changes, and if they appear it accelerates their revitalization. The same works for smallpox, when it also eliminates itching.

It is also safe to use in the treatment of oral mucositis, aphtha, thrush, mycosis, and also on intimate organs (eg. genitals).

OZONFIX® is also an Antibacterial, and for example, can be used to treat: ear inflammation, complications on wounds, etc.

OZONFIX® can be used for cosmetic purposes. Firming and oxygenating the skin, reducing effects of cellulite.

It helps as well to accelerate the absorption of subcutaneous hematomas.

OZONFIX® DOES NOT IMMUNIZE THE MICRO-ORGANISMS TO ITS EFFECTS, **which makes it a safe preparation for everyday use.** for everyone.

## METHOD OF APPLICATION

OZONFIX® should be applied in a sterile manner using the integrated dropper (pipette) on the wound and its environs. For best performance the wound should be clean and free of necrotic tissue. Use 2 to 3 times a day for a minimum of 5 days.

For shallow wounds, where dressing may not need to be applied, gently rub the solution onto the affected area.

In the case of deep wounds, it can be used as the so called wet dressing by soaking the sterile gauze or the sterile bandage with OZONFIX® and leaving it on for a longer period.

## POSSIBLE SIDE EFFECTS

The preparation works against histamine even through the skin. Redness after application may indicate a strong reaction with histamine. The reddening should diminish after a short while without any discomfort. Ingestion of OZONFIX® results in gastrointestinal sterilization and diarrhea. Probiotics should be used.

## STORAGE

OZONFIX® should be stored safely and securely, away from children under 3 years old and at room temperature in a tightly closed, original container.

Shelf-life of the product - 12 months from opening the package
